X tower / iO.BOT

Robotic Camera System: Simple, flexible & affordable

The X tower is a remotely controlled vertical movement system, ideal for discreet and noiseless operations in studios, whether mounted vertically, on the ground, or on the ceiling. Its precise tracking capability enables smooth broadcasting while in motion, supporting PTZs, remote heads, or ARCAM, and it can quickly be concealed when not in use.

AR+ 4K ULTRA HD HDR

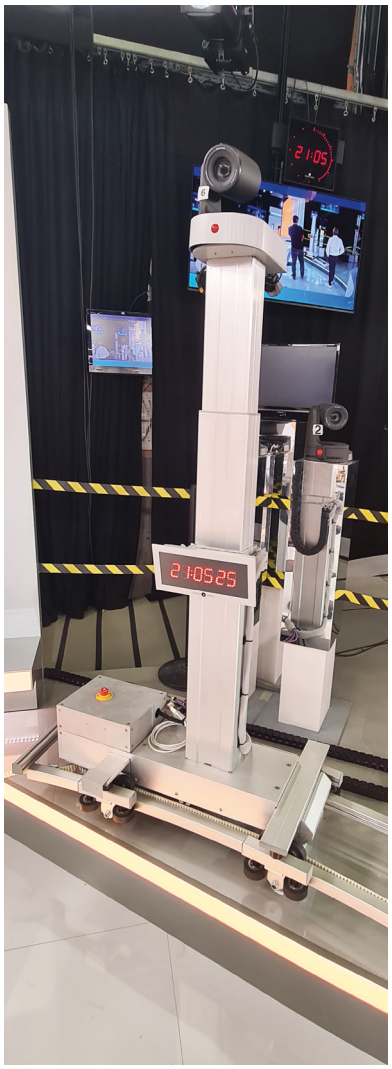
- Stroke from **55cm to 80cm**
- Noiseless and speed **up to 4cm/s**
- Can be mounted **upright or upside down**
- Can be used **for PTZ, remote head and ARCAM**
- Full motion control **with IP**
- **Full FreeD** tracking compatible
- **Cable management** carrier included

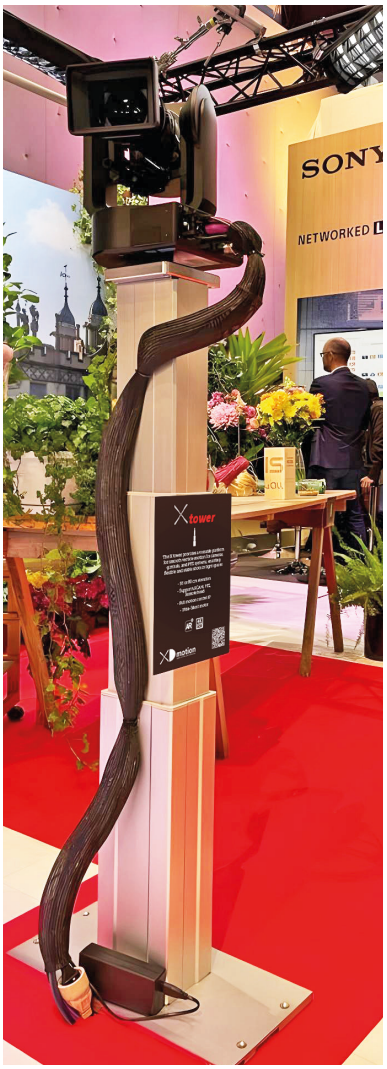
Fully compatible with studio and control room devices

& PLAY
Easy to setup, use & Fast training

3D AR+
3D Engines & Augmented Reality

Precise & smooth for perfect shots





ARCAM

- **6 axis full motion** control arm
- Programmed to move on **3D**
- Optional dolly for **upside/down use**
- Support any camera & lens **up to 12,5/20 Kg (ARCAM 10/20)**

Robotic Head

PTZs

- Control up to 16 PTZs at the **same time from the software**

X dolly

X tower

X track

Automation System

- **Connect** your robotic & automation systems
- **Compatible** with any automation systems

iO.BOT

ONE SOFTWARE **TO RULE THEM ALL**

- Control your **ARCAM and all your PTZs**
- Connect them to **any 3D Engines and Automation System**
- Define **Unlimited trajectories**
- Optimized for a **Broadcast use**

3D Engine

- Get all the robot's **information in real time**
- **Compatible** with any 3D engine
