

X tower / IO.BOT

Robotic Camera System: Simple, flexible & affordable

The X tower is a remotely controlled skate movement system. Due to its discretion, it is perfect for studios, vertical, on the ground or on the ceiling, and it is able to hide quickly. Its tracks precision capability allows to broadcast on the move, from PTZs, remote head or ARCAM.

- Stroke from **55cm to 80cm**
- Noiseless and speed **up to 4cm/s**
- Can be mounted **upright or upside down**
- Can be used for **PTZ, remote head and ARCAM**
- Full motion control **with IP**
- **Full FreeD** tracking compatible
- **Cable management** carrier included

Fully compatible with studio
and control room devices

Easy to setup, use
& Fast training

3D Engines
& Augmented Reality

Precise & smooth
for perfect shots

ARCAM ROBOTS

- **6 axis full motion** control arm
- Programmed to move on **3D**
- An optional dolly can support the **arm upside/down**
- Support any camera & lens **up to 12,5 KG payload (NEW)**

Automation System

- **Connect** your robotic & automation systems
- **Compatible** with any automation systems

ROBOTIC HEAD

- Control up to 16 PTZs at the **same time** **from the software**

iO.BOT

ONE SOFTWARE TO RULE THEM ALL

- Control your **ARCAM** and all your **PTZs**
- Connect them to **any 3D Engines** and **Automation System**
- Define **Unlimited trajectories**
- **Ergonomic** Interface
- Optimized for a **Broadcast use**

3D Engine

- Get all the robot's **information in real time**
- **Compatible** with any 3D engines
