VISIT US AT BOOTH: 12E56

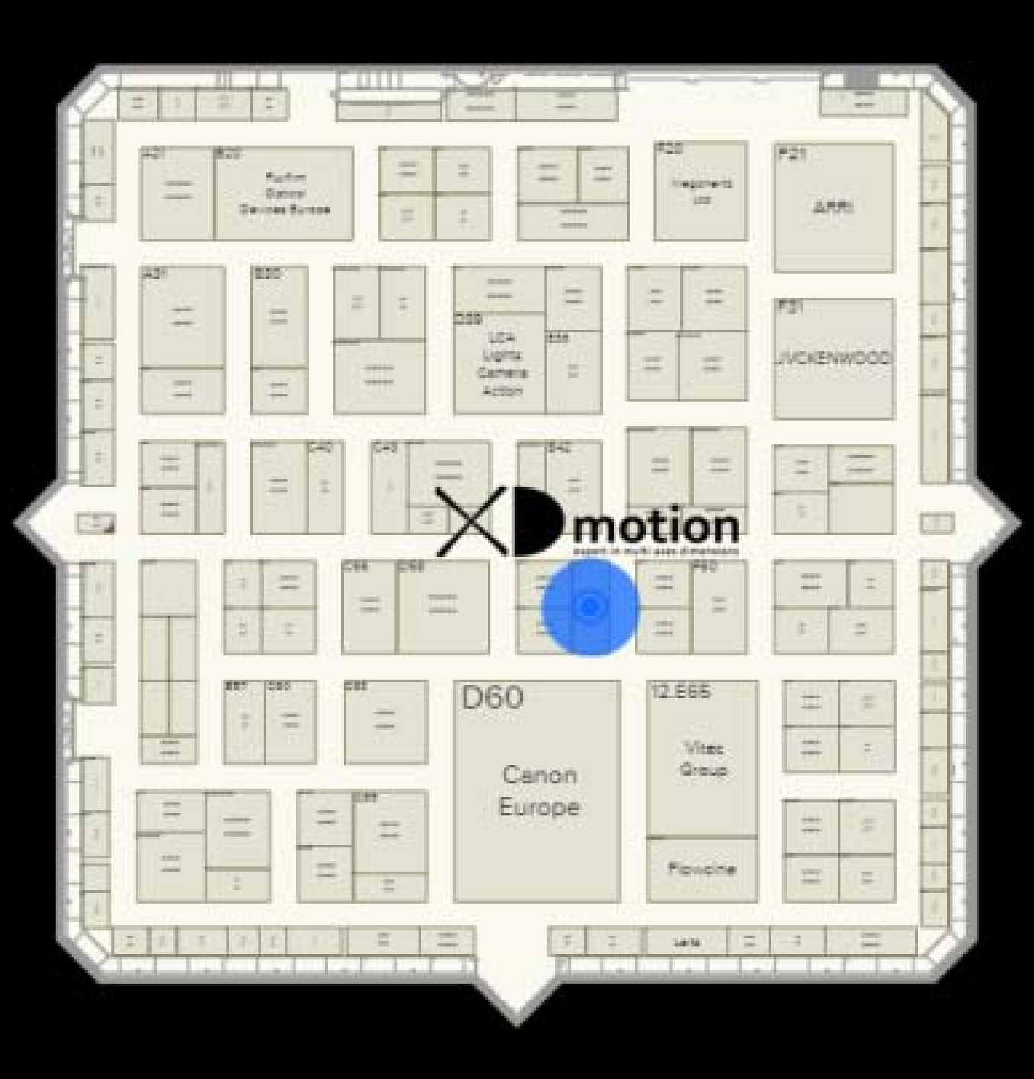
Join us at IBC 2019

Exhibits will run from September 14-18 at the RAI AMSTERDAM.

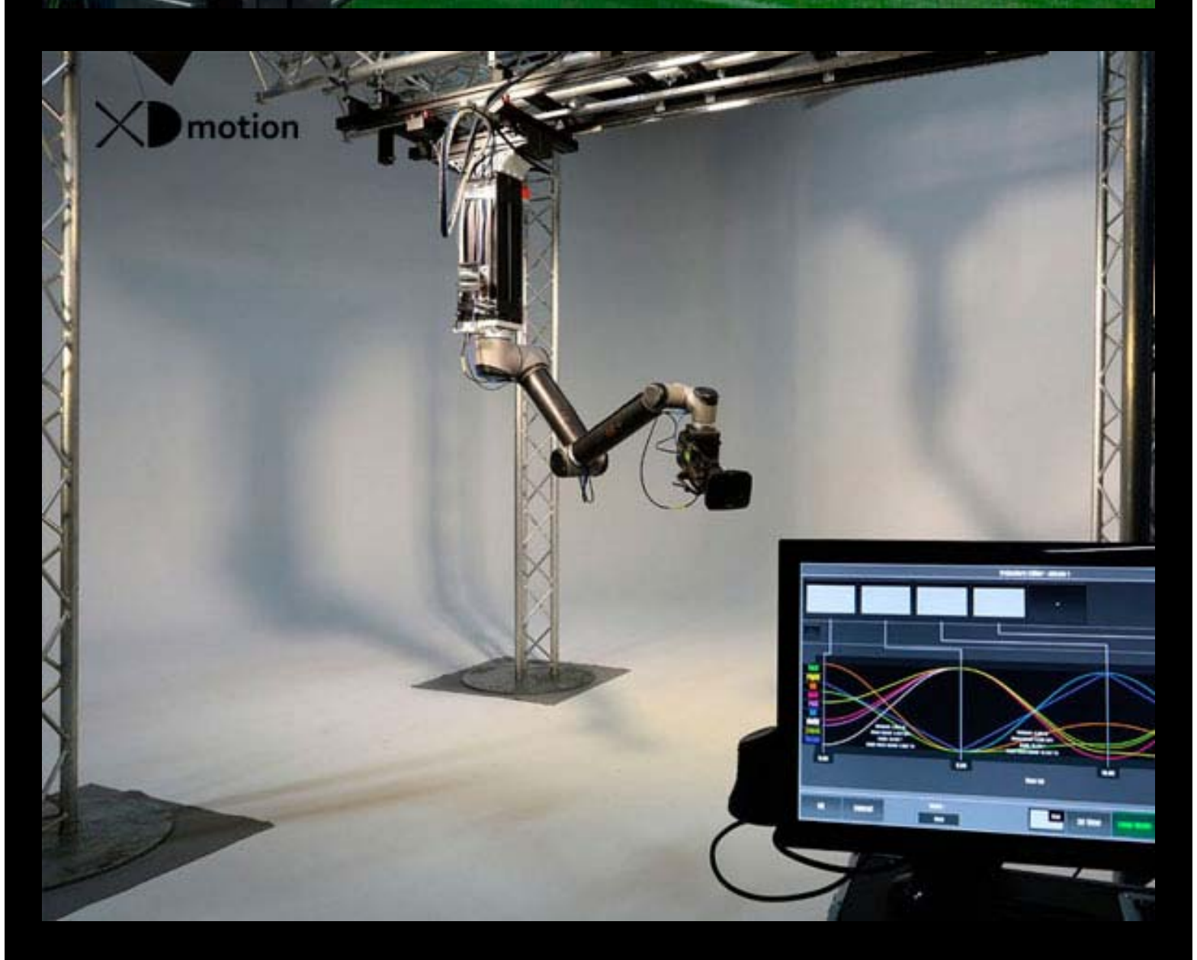
Stop by XD motion and GSS booth 12.E56 and meet Benoit DENTAN.

Benoit and his team will introduce the AR/4K X fly 3D cablecam system, the last updates on Ultra-Light GSS/Cineflex 12' 4K, X fly 1D Mini, ARcam/Iobot robotic arm, Tethered Drone and Mini Russian Arm Electric.

XD motion will also present their new amazing demo productions.



ARCAM / IOBOT



XD motion is proud to announce the purchase of the company AR Plus who design AR Robotics Arms with specifc motion control Software. Our engineers will increase the value of the products by adding a new software version iOBot who controls multi PTZ and remote heads + tracks.

Partners exhibiting with Arcam: Dreamwall and White Light

Tethered Drone. 4K

Tethered Drone Formula 1

Alfa

- Power/Optical fiber rope to ground 100 meters height
- Power generator on ground for full autonomy
- Motorized winch control for rope tension
- Full HD/4K camera Live with control painting
- Full Zoom capacity with HD lens control
- Safety maximize by rope tension
- Aerial certification authorities
- Reduced crew for operational with 2 technicians
-Payload 10 Kg capacity to lift
- Lightweight flight cases for low cost shipment

X fly 3D 4K 8K AR

X fly 3D Augmented Reality Live
for European Elections

Election Night
26 May 2019
election-results.eu

X fly 3D is for the first time in the world installed in the hemicycle of a parliament to cover the Presidential and European elections. The level of security Brussels to reach for fly over this place gathering the highest personalities of the political world is at the highest level ever reached. The innovation was to fix the points of attachments in a location not adapted to this type of installation and especially to offer a quality of very stable shots to integrate the augmented reality of the company Dreamwall in Live worldwide. No tracking, only real time metadata of the X fly 3D are generated for the graphic AR integration.

GSS

The Cineflex Pro is the smallest and lightest Gimbal in the world capable of Housing the Sony HDC-P50 4K Camera (Not repackaged/exploded) with the long zoom 4K/UHD lens from either Canon (CJ45ex9.7B) or Fujinon UA46x9.5BE). The entire package weighs <70lbs/31kg.

- ALAC Aberration Correction communication between the camera and lens comes standard
- End of the lens stability at maximum Helicopter speeds is the best in the industry
- GSS systems are never ITAR controlled. Shipping them around the world does not require special paperwork
- GSS Cineflex Pro can be packed in excess baggage cases in minutes for easy travel
- Inertial Navigation System for Moving Map Overlays and Augmented Reality

Download GSS Cineflex Pro

Mini Russian Arm Electric

Resulting from a partnership with Kris Theuwis (321 Company), this vehicle is lighter, more compact and non-polluting. It guarantees a most discreet filming !

Russian Arm Mini is lightweight and compact but powerful enough to go high speed and work in most challenging conditions. It is capable of 360° pan, tilting up and down allowing a wide range of impressively stable, smooth and very dynamic shots. Russian Arm Mini system is operated via joystick consoles from within a camera car.
