# **GSS C520, C516, B520 and B516:**

Lighter, smaller, more flexible, easier to ship .....

## ***Why GSS systems?***

Because they are the latest advanced products in the industry. 5-axis systems designed to evolve with technology thanks to free software updates.

## ***What are the most important advantages of GSS systems?***

Platforms created to integrate easily new cameras. Camera and lens payloads in an interchangeable and upgradeable system. They have an increased ground clearance, more aircraft mounting, they are more robust due to less complexity. GSS systems are easier to ship as excess baggage. No ITAR or EAR export restrictions.

## ***What are the differences between the C series and B series?***

C for Cinema Series with digital camera and B for Broadcast Series.

## ***Why 520 and 516?***

The GSS C516 and B516 are the smallest with a gimbal diameter of 16 inches (406mm) against 20 inches (508 mm) for the GSS C520 and B520.

Regarding their different diameters the GSS C520 and B520 are great products for the largest camera/lens payload configurations.

## **C520 and C516 à Camera/Lens Options (Interchangeable):**

### **• Cameras Options C520 and C516**
